<b>Vegetable Seeds January 15 -31</b>	<b>Herbs</b>	
Beets Bok Choy Broccoli Cabbage Carrots Chard Cauliflower Collards Cress Kohlrabi Leek Lettuce Onion Sets Parsnip Peas, Edible Pod Peas, English Radish Rutabaga Shallot Spinach	Chervil Chives Cilantro Horseradish Oregano Parsley Rosemary Sage Thyme	
	<b>Fruit Trees</b>	
	Now is the time to plant berries, fruit trees, and grapes. Make sure that you add compost to the hole and that you add Mycorrhizal Fungi to help get the plants started. You also need to watch out for some varieties the first year during a freeze. They may need covered up with an old blanket. It sure is a joy to have fresh fruit in your yard, so look around and see where you can plant some fruit today.	
<b>Flower Transplants</b>	<b>Strawberry Fields Forever</b>	<b>Bulbs</b>
Alyssum Bluebonnet Butterfly Weed (Asclepias Tuberosa) Calendula Candytuft Cornflower Daisy (African, Michaelmas & Painted) Dianthus Gaillardia Gayfeathers (Liatris) Johnny Jump-Up Lobelia Nasturtium Ornamental Cabbage and Kale Pansy Phlox Paniculata Snapdragon Stock	Still have strawberries on your mind? Well, I guess you had better plant them! If you have some in the ground please be good to them and fertilize them now a well.
